EDUCATION

State University of New York at Buffalo

Masters of Science in Computer Science

Buffalo, NY

Aug. 2025 – Present

University of Mumbai

Bachelors of Engineering in Computer Engineering

Mumbai, India

Aug. 2020 – Jun. 2024

EXPERIENCE

CarWale [CarTrade Tech]

Software Development Engineer - I

Mumbai, India

Apr. 2025 – Jun. 2025

- Engineered and maintained the 'Oxygen Design System', a core library of **70+** reusable components in **React** and **React Native** that directly supported **80 million** monthly users while utilizing **Redux**, **Jest**, **Grafana**, and **Agile** methodologies.
- Drove **web performance optimization** initiatives, achieving a **10% reduction** in bundle size on critical pages by architecting and introducing a new **counter-based hashing system**.
- Led the architectural design and implementation of a **dark theme** for **60+** **React Native** components, using **React Context** and **custom hooks** to achieve seamless, no-reload theme switching.
- Accelerated project delivery by **85%** by leveraging **AI-driven automation** and **prompt engineering** to update over **250 files** in **two days**, beating a **two-week estimate**.

Associate Software Development Engineer

Aug. 2024, Apr. 2025

- Streamlined component architecture** by replacing over **500** unnecessary **div** wrappers with a **custom React hook**, significantly improving **web performance**, **reducing memory consumption**, and enabling **faster JavaScript** execution.
- Created** interactive templates for all platforms of CarWale and CarTrade application, ensuring cross-platform compatibility and achieving **5 million plus impressions** over **2 weeks**

Indian Development Foundation (NGO)

Software Development Intern

Mumbai, India

Oct. 2023 – Apr. 2025

- Engineered a **full-stack web application** using **Next.js**, **React**, **MySQL**, and **NextAuth** to streamline and manage the 'Balgurukul' operations.
- Engineered and implemented an **automated grading system** and **role-based logins**, which together improved overall efficiency by **80%**.
- Achieved an almost **90% reduction** in grading time for over **50 students** by designing an **intuitive user interface** that streamlined administrative workflows.

PROJECTS

Beacon | NextJs, React, React Native, MongoDB, Google Maps

June 2025 – Present

- Engineered a **real-time location-sharing application** that provides users with **granular control** over their **live location access**.
- Designed and implemented a **comprehensive permission management system** to handle **4 distinct relationship states**, providing users with **granular control** over who can view their live location.
- Developed a **unified Native Bridge communication layer**, enabling the **React Native** UI to seamlessly send commands and receive diagnostics from **native mobile modules** for tasks like background service control.
- Architected and developed a **web-based mobile application** to replace a **complete native solution**, leveraging **React Native's bridge** to gain access to critical native features while **accelerating development cycles** and facilitating **faster, more frequent updates**.

TECHNICAL SKILLS

Programming Languages: JavaScript, Python, C#, Java, HTML/CSS

Frameworks: ReactJs, NodeJs, .NET, NextJs, Flask

Databases: MySQL, NoSQL

Tools & Platform: Git, Docker, Google Cloud Platform, Amazon Web Services

System Design: Scalable architecture, Microservices, RESTful APIs, Event-Driven Architecture

Other: Agile Methodologies, Unit Testing, Cross-Platform Development
