Education

State University of New York at Buffalo August 2025 — December 2026

Master of Science in Computer Science (3.83 GPA)

University of Mumbai August 2020 — June 2024

Bachelor of Engineering in Computer Engineering (8.63 CGPA)

Experience

Software Development Intern January 2026 — July 2026

Safety Knights (CSE 611)

- Shipped a production MEAN stack job board for the EHS industry across 3 codebases: Express/Node.js backend with 75+ REST endpoints and AES-256 request encryption, Angular v17 SSR consumer app, and standalone Angular admin console deployed to prod.
- Designed 4 Mongoose models (compound, geospatial, full-text indexes); implemented multi-axis job search, lifecycle management, and automated hourly expiration via node-cron.
- Built end-to-end candidate application pipeline with GridFS résumé/document storage, 5-status tracking, and 3 automated Mailtrap email flows; added admin console with candidate filtering by location/experience/certifications and a daily cron-triggered expiry digest for admins.

Software Development Engineer August 2024 — June 2025

CarWale [CarTrade Tech]

- Engineered and maintained the 'Oxygen Design System', a core library of 70+ reusable components in React and React Native that directly supported 80 million monthly users while utilizing Redux, Jest, Grafana, and Agile methodologies.
- Drove web performance optimization initiatives, achieving a 10% reduction in bundle size on critical pages by architecting and introducing a new counter-based hashing system.
- Led the architectural design and implementation of a dark theme for 60+ React Native components, using React Context and custom hooks to achieve seamless, no-reload theme switching.
- Accelerated project delivery by 85% by leveraging AI-driven automation and prompt engineering to update over 250 files in two days, beating a two-week estimate.
- Created interactive templates for all platforms of CarWale and CarTrade application, ensuring cross-platform compatibility and achieving 5 million plus impressions over 2 weeks.

Software Development Intern October 2023 — April 2024

Indian Development Foundation (NGO)

- Engineered a full-stack web application using Next.js, React, MySQL, and NextAuth to streamline and manage the 'Balgurukul' operations.
- Reduced grading time by 90% for 50+ students by building an automated grading system with role-based logins and an intuitive admin UI.

Projects

Beacon June 2025 — August 2025

Real-time location-sharing application with granular permission controls

- Designed and implemented a comprehensive permission management system to handle 4 distinct relationship states, providing users with granular control over who can view their live location.
- Engineered a Unified Native-Web Bridge to facilitate bi-directional communication between a WebView-based UI and native mobile modules, enabling web-based commands to control critical background services and retrieve real-time system diagnostics.
- Architected and developed a web-based mobile application to replace a complete native solution, leveraging React Native's bridge to gain access to critical native features while accelerating development cycles and facilitating faster, more frequent updates.

Skills

Programming Languages: JavaScript, Python, C#, TypeScript, Java, HTML/CSS

Frameworks: ReactJs, NodeJs, NextJs, Angular, .NET, Flask

Databases: MySQL, NoSQL

Tools & Platform: Git, Docker, Google Cloud Platform, Amazon Web Services

System Design: Scalable architecture, Microservices, RESTful APIs, Event-Driven Architecture

Other: Agile Methodologies, Unit Testing, Cross-Platform Development
